

## Case Study

Custom Walk-In chamber with specialized airflow provides solution for testing server racks

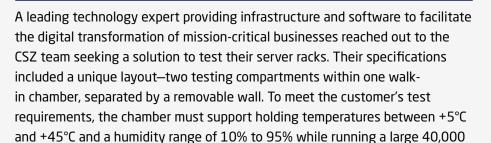

## **SYSTEM HIGHLIGHTS**

- Dual-sided chamber with removable center divider
- Independent operation or combined functionality
- Robust refrigeration systems for precise temperature control
- Access doors to conditioning plenums for maintenance ease
- Tri-color light towers with audible alarms for monitoring
- Duplex outlets for additional equipment connectivity
- Emergency Power Off switches for safety precautions
- Enhanced operator safety with "Escape Route" doors
- Front and rear access to the System Under Test for convenience.

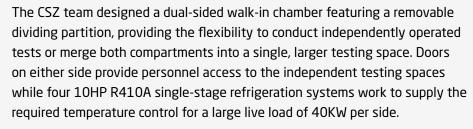

## **CHALLENGE**

## **SOLUTION**

watt server load.

This approach ensured versatility in testing scenarios while maintaining precise environmental control.
